

MRI Sedation

Suggestions for Your MRI Exam

Mild to Medium Claustrophobia

Have your referring physician prescribe a prescription for a sedative to help you relax and complete the exam. Be sure to bring a friend that can stay with you in the MRI room and drive you home.

Medium Claustrophobia

Call our scheduling department and ask for Versed sedation. This is performed on certain days of the week at different locations of Radiology Regional Center.

VERSED PREP: Nothing to eat or drink after 10:00pm the evening prior to the scan and bring a friend to drive you home.

Available at: 6100 Winkler Rd., Ft. Myers · 805 Del Prado Blvd., Cape Coral · 700 Goodlette Rd., Naples

Severe Claustrophobia

Have your referring physician schedule you for full sedation Diprivan (propofol). This is performed on certain days of the week at different locations of Radiology Regional Center.

FULL SEDATION (DIPRIVAN) PREP: Nothing to eat or drink after midnight the evening prior to the scan and bring a friend to drive you home.
